#### Notes: Index Explanation

Circulation field's important means of production market prices refers to wholesale and sales prices of enterprises operating in important means of production. Different from factory price, important means of production's market price includes the ex-factory price, and also includes businesses subject to the circulation cost, taxes, fees, etc.

The ex-factory price and the market price have time lag between each other, meaning trend changes of both sides can at any given time not be consistent.

## 2. Monitoring content

The monitoring of important means of production market prices in the circulation field includes 9 categories comprised of 50 products between them. For details on category and product specification, refer to the attached table.

## 3. Monitoring scope

The monitoring scope covers 31 provinces nationwide (districts, cities)

Over 300 trading markets of nearly 2000 wholesalers, agents, distributors, and other business enterprises.

## 4. Monitoring method

Price monitoring method is comprised of on-site price collection by information officers, phone, instant messaging tools, email inquiries etc.

## 5. Up and down number statistics

Products that rose in price, fell and stayed level according to the rate of increase or decrease (%) for statistics.

## 附注

### 1.指标解释

流通领域重要生产资料市场价格，是指重要生产资料经营企业的批发和销售价格。与出厂价格不同，生产资料市场价格既包含出厂价格，也包含有经营企业的流通过程中的费用、利润和税费等。出厂价格与市场价格互相影响，存在时滞，两者的变动趋势在某一时间段内有可能出现不完全一致的情况。

### 2.监测内容

流通领域重要生产资料市场价格监测内容包括9大类50种产品的价格。类别与产品规格说明详见附表。

### 3.监测范围

监测范围涵盖全国31个省(区、市)300多个交易市场的近2000家批发商、代理商、经销商等经营企业。

### 4.监测方法

价格监测方法包括信息员现场采价，电话、即时通讯工具和电子邮件询价等。

### 5.涨跌个数的统计

产品价格上涨、下降、持平个数按照涨跌幅(%)进行统计。
